CRFS and sustainable land use

- **Promote (agro ecological) urban, peri-urban and rural agriculture production in city region** to improve agricultural livelihoods, ensure a safe and nutritious urban food supply, optimise local production capacity to reduce dependence on distant supply sources
- **Regulate urban expansion on agricultural land**, by preserving and protecting agricultural land from (unplanned) urban expansion through land use planning, enhance secure tenure
- **Support short supply chains, processing and distribution and marketing support in land use planning**

Thank you
