PFAS demonstration projects

Cleaning PFAS from soils at PFAS testcenter Korsør

Background

- Finance Act 2023
 - 10 mio. DKK (app. 1.3 mio. euro)
 - To be used by the regions for large scale testing of remediation technologies

Project setup

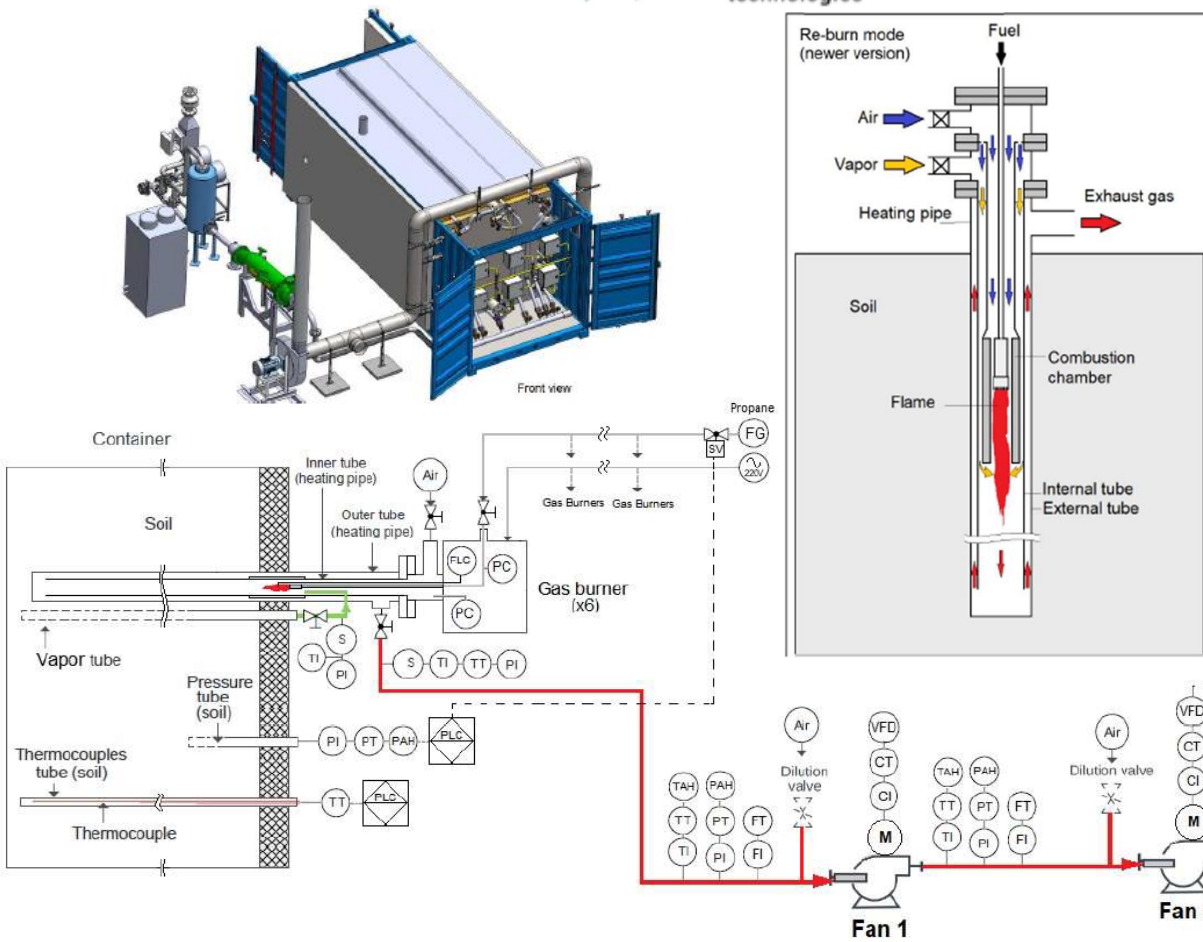

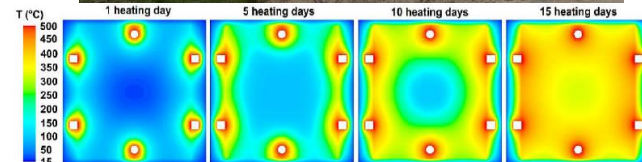

- Water >< Soil
- Possible technologies for soil:
 - Market dialogue
 - Destruction >< Stabilization
- Scale: pilot test, 20 cubic meters of soil
- On site at Korsør RESC (national PFAS testcenter)
- Soil contamination: $\Sigma 4\text{PFAS}$ 170 $\mu\text{g/kg}$

Project Setup

- Tender: Fixed price 3.5 mio. DKK per project
- Two offers
 - Both thermal
- Startup early 2025
- Finished by the end of May 2025

Project No. 1:

Project no. 2: KRÜGER VEOLIA
