27 entry in the Basel list not applied:

“A2060 Coal-fired power plant fly-ash containing Annex I substances in concentrations sufficient to exhibit Annex III characteristics (note the related entry on list B B2050)”

28 OECD Member countries may control these wastes differently in accordance with Chapter II B 6 of Decision C(2001)107/FINAL concerning wastes not listed in Appendices 3 or 4, and the chapeau of Appendix 3 to the OECD Decision. Concerning this the Correspondence meeting of EU has approved Correspondence Guideline No 4.

29 This entry includes spent potlinings from aluminium smelting without inorganic cyanides but containing Y32, inorganic fluorine compounds excluding calcium fluoride.

**A4080** Wastes of an explosive nature (but excluding such wastes specified on list B)

[^30]: The 50 mg/kg level is considered to be an internationally practical level for all wastes. However, many individual countries have established lower regulatory levels (e.g., 20 mg/kg) for specific wastes.

[^31]: "Outdated" means unused within the period recommended by the manufacturer.

[^32]: This entry does not include wood treated with wood preserving chemicals.

[^33]: This entry includes spent potlinings from aluminium smelting containing Y33, inorganic cyanides. If the cyanides have been destroyed, spent potlinings are assigned to Part II entry AB120 because they contain Y32, inorganic fluorine compounds excluding calcium fluoride.
