

## Proportion of forest area certified under PEFC or FSC\*

\* This refers to the forested area, i.e. the area under permanent use for timber production

\*\* partially revised

\*\*\*The target cannot be related directly to the two components of the indicator, because it refers to the areas certified according to high-quality environmental standards:  
Areas can be certified under both PEFC and FSC. The extent of double certification is not known. In the case of this indicator it cannot therefore be judged whether the target has been reached.

PEFC and FSC certified areas: Programme for the Endorsement of Forest Certification Schemes (PEFC) and Forest Stewardship Council (FSC); Source total forested area: Forested areas, from BWI 2 up to 2002, from BWI 4 after 2022, linear interpolation between values from BWI 2 and 3 between 2002 and 2012, linear interpolation between values from BWI 3 and 4 between 2012 and 2022
