

## Population exposed to PM2.5-concentrations exceeding the WHO 2005 annual mean guideline value\*

\* Guideline value according to Air Quality Guidelines 2005:  $10 \mu\text{g}/\text{m}^3$ ; The calculations are based on present population density results (population census 2011).

\*\* Target set by UBA compared to the German Sustainable Development Strategy (PM10)
