

## Newsletter of the ICP Modelling & Mapping – 2019/07

Issued by CCE and ICP TF Chair

### Progress regarding the Workplan 2018-2019

In order to support the work of the ICP Modelling and Mapping several projects are about to start soon. One project supports the CCE-internal workflow with the statistic program R, one project prepares the review of the empirical Critical Load and the third is focused on the update of the CCE background database. For more detailed information contact [cce@uba.de](mailto:cce@uba.de).

### Participation of the NFC of the ICP M&M

As mentioned above, several projects are about to start soon, and we would appreciate your participation. Especially for the preparation of the review of empirical Critical Load we would like to gather information of any person/group in your country/institution which is dealing with empirical studies on effects of air pollution. You can send this information very informally to our E-mail address: [cce@uba.de](mailto:cce@uba.de)

### Recent activities of CCE and TF chair

- 04/2019 – CCE participated at the TFIAM meeting in Berlin
- 05/2019 – CCE and TF chair presented the current status of ICP M&M at the joint meeting of the ICP Integrated Monitoring and ICP Waters in Helsinki
- 07/2019 – CCE started exchange about future collaboration with the new chair of the program center of the ICP Forests at the meeting of national parties of the CLRTAP in Neuglobsow

### Upcoming event: INI2020

Besides upcoming regular meetings of the convention we would like to announce the 8<sup>th</sup> Global Nitrogen Conference (INI2020) of the International Nitrogen Initiative under the headline “Nitrogen and the UN Sustainable Development Goals”. The conference is hosted by the German Environment Agency and the Federal Ministry for the Environment and will take place on 3-7 May 2020 in Berlin. Further information as regards the program and the registration can be found under <https://ini2020.com/>
