Corrigendum to the AgBB Evaluation Scheme 2018

The following error was amended in the updated version of the AgBB evaluation scheme 2018: The correct LCI value for 1-propenyl benzene (β -methyl styrene) (LCI No. 1-9, CAS No. 637-50-3) is 1200 $\mu\text{g}/\text{m}^3$. The value "2400 $\mu\text{g}/\text{m}^3$ " is false.

Furthermore, the following amendments were made in the LCI list 2018:

- Addition of CAS Nos. 73543-95-0 for LCI No. 7-11 2-hexenal and 57266-86-1 for LCI No. 7-12 2-heptenal.
- Addition of the designation "VVOC" in the Remarks-column for LCI 7-1 Butanal.
- Correction of the Remarks-column for LCI No. 7-23 Propenal to "VVOC; Individual substance evaluation".
- Additional remark II "Data treatment" was deleted upon request of the DIBt.
