

Support for academics from Ukraine

1. department
V 1 - Climate protection and energy
2. brief profile of the department
<p>The department works on issues regarding the climate system, climate change and climate protection on national, european and international level. We outline necessary transformations towards a sustainable energy system with its various implication for Germany and Europe. Our focus lies on reducing energy consumption and completely converting the supply of electricity and heat to renewable energies while at the same time reducing the associated environmental effects. We hold the National Lead for Emission (Single National Entity) on greenhouse gases and air pollutants and energy related monitoring including governmental reporting and administration of various data bases for this purpose. Furthermore, we manage the Registry of Guarantees of origin, which prove the origin of electricity from renewable energies as well as the Registry of Guarantees of regional origin, which verify the regional origin of electricity from renewable energies.</p>
3. areas of study for visiting scientist
<ul style="list-style-type: none"> <input checked="" type="checkbox"/> Agricultural and Forest Sciences <input checked="" type="checkbox"/> Social Sciences <input checked="" type="checkbox"/> Engineering Sciences <input checked="" type="checkbox"/> Natural Sciences <input type="checkbox"/> Medical and Health Sciences <input checked="" type="checkbox"/> Mathematics and Computer Sciences <input checked="" type="checkbox"/> Economics-, Law- and Administration Sciences
