

35th ICP M&M Task Force Meeting

Conclusions

Workplan items
Scientific challenges

Workplan structure

- Activity description/objective
- Expected outcome/deliverable
- Lead body(ies)
- Resource requirements and/or funding source

Steady-state models

- Background DB update – Workplan item
 - Gap filling process
 - Invitation to NFCs to participate in reviewing the method
 - Coordination = CCE
 - Ressources = CCE

Empirical CL

- Empirical CL update – **Workplan item**
 - Countries and other ICPs are encouraged to contribute actively
 - ICP MM asks WGE to issue a call for contribution to support the process of the revision on empirical CL
 - Coordination = CCE
 - **Ressources = CCE and further cover by recommended contributions by National Focal Centres**

CL for Biodiversity

- CL biodiversity development – **Workplan item**
 - NFCs are encouraged by ICP MM to carry on the process of developing CL biodiversity
 - Coordination = ? /ICP MM
 - **Ressources = ? / JEG / by recommended contributions by National Focal Centres**
- ICP MM encourages intensive exchanges with other bodies (e.g. other ICPs, monitoring groups outside the convention)

Call for data

- ICP MM asks WGE to issue a CfD to NFCs
- Linked to potentiel revision of GP (2012)
- 2-year timeline until 2021
- deliverables
 - SMB – data for IAM
 - Empirical CL – data for IAM
 - Biodiversity CL – method development

Continuing scientific challenges

.....to highlight in the minutes

- Combining Empirical CL with modelled CL, including biodiversity
- Empirical CL used as an indicator for biodiversity?
- CL biodiversity: continue collaboration with JEG, training sessions
- Exchanges on methods applied to calculate CL, including Critical Limits

Collaboration issues

- CCE facilitates more regular communication among NFCs (e.g. newsletter)
